## Celebrating the Successful Conclusion of AI4GreenSME

## A JOURNEY TOWARDS GREENER, SMARTER SMES

**WELCOME  
TO OUR 4TH  
NEWSLETTER**

After two years of dedicated work, the **AI4GreenSME Erasmus+ project** proudly concludes its mission of empowering European SMEs with the skills to harness **Artificial Intelligence (AI)** and embrace the **Circular Economy (CE)**.

From research and training design to piloting and certification, the project has built a strong foundation for SMEs to thrive in the digital and green transition.

**CONCLUSION OF  
AI4GREENSME  
PROJECT**

# HIGHLIGHTS & ACHIEVEMENTS

## Training Platform – Impact & Results

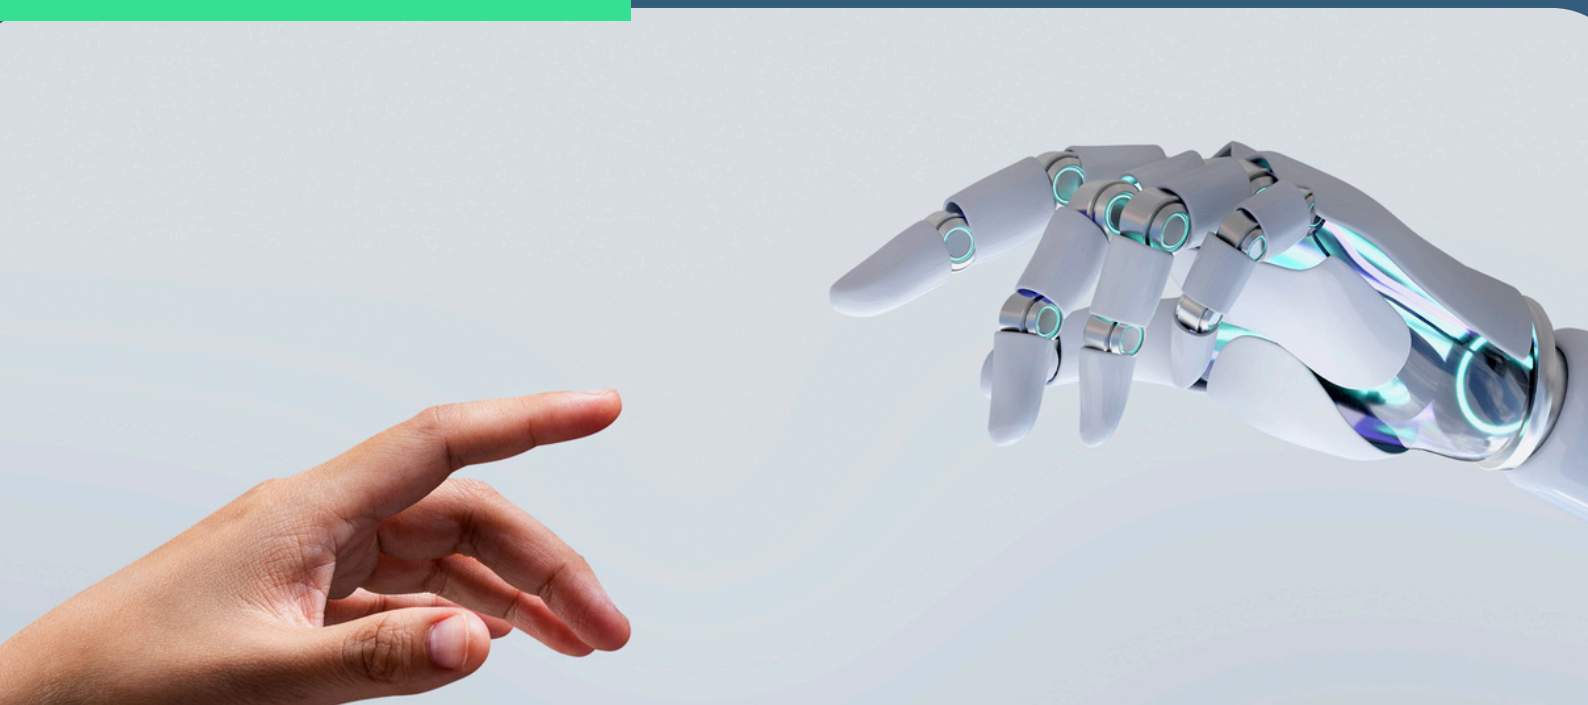

- Tested by 50+ SMEs across Europe, the online course achieved an **average satisfaction rating above 4.3/5**.
- Over **90% of users** confirmed that the training will help their businesses operate more sustainably with AI.
- The curriculum, aligned with **DigComp** and **GreenComp**, provides **10 modules**, case studies, and interactive resources.

## Micro-Credentials & Certification

- **Learners earn digital badges for each module and a final Europass-compatible certificate, ensuring recognition of their new competences.**
- **This system supports employability and encourages SMEs to continue developing their green and digital skills.**

## Collaborative Activities – Learning Together

- **10 international peer-learning sessions** covered essential topics: AI Literacy, Circular Business Models, Data Management, Product Design, Ethics, and more.
- Participants rated organisational quality **4.2–4.8/5** and praised the opportunity to network across borders and sectors.
- Many called for a **permanent European community of practice** — now launched through the AI4GreenSME Network.

# HIGHLIGHTS & ACHIEVEMENTS

## Building a Lasting Legacy

- The project leaves behind an **open-access training platform** (CC BY 4.0 license) for reuse by chambers of commerce, VET providers, and SMEs.
- The **AI4GreenSME Network** will continue connecting SMEs, trainers, and innovation hubs to share experiences, tools, and best practices.
- A **long-term roadmap (2025–2027)** ensures sustainability and network expansion.

## FINAL WORDS FROM THE CONSORTIUM

AI4GreenSME has proven that **small businesses can lead Europe's twin transition** when provided with the right training, tools, and support. With strong results from pilots, high satisfaction from SMEs, and a network that will live beyond the project, the initiative is set to leave a lasting mark on the European SME landscape.
